Dear Patient,

North Sunflower Cosmetics is now offering cosmetic laser and IPL procedures that are safe and very effective. We have waited to offer a lot of these treatments until the technology and medical protocols were developed to the point that they met our standards for medical excellence.

We are pleased to offer the following services using state-of-the-art Spectrum Laser System: Enhanced Skin Rejuvenation, the Elimination of Vascular and Pigmented Irregularities, including sun damage, skin discoloration, the reduction of small facial blood vessels, , the reduction and removal of leg veins, the removal of tattoos and the removal and reduction of wrinkles. These laser/IPL treatments really work and have minimal down time.

- Permanent Hair Reduction: Everyone has it, the permanent reduction of unwanted body hair from virtually any part of the body. Our diode laser system has been FDA approved and can be used for all ethnic groups and skin colors including tanned skin.
- Eliminate unsightly spider veins and broken capillaries. With our advanced Yag laser system, you will see noticeable improvements after only a few treatments.
- Laser Resurfacing: Our Erbium Yag Laser will freshen your appearance and improve skin texture with minimal downtime.
- Remove Unwanted Body Art: "Erase Regret". Our Q-Switched Yag Laser breaks up tattoo ink into tiny particles removing what was supposed to be permanent.
- Acne Treatments for Adults and Teens. This IPL approach reduces acne by infusing intense pulsed light into the bacteria. Improvements are normally seen within just a few days after the treatment.
- Skin Rejuvenation: Lighten, Tighten and Brighten! This laser treatment uses IPL to lighten pigmented lesions (brown spots), tighten fine lines and wrinkles, and brighten skin complexion.

Don't wait any longer to look as good as you feel. Costs for these treatments are probably less than you would expect. Call us today for an expert consultation (662) 756-4000.

*Sincerely,*  
*North Sunflower Cosmetics*
